SUMMARY

AI Automation Engineer with a BSc in Artificial Intelligence and 4+ years of experience. I turn real problems into working solutions: I map the manual work, build the tool and verify the result. AI sorts; people decide. I direct AI coding agents from spec to release, and I run my own Arabic/English product line of AI apps for sales, hiring, job search, voice and video.

EXPERIENCE

AI Automation Engineer (Information Systems Developer) 2025 – 2026
Medmac Kuwait Co. (General Trading & Contracting) · Kuwait

- **Turned noisy leads into real buyers:** a bilingual CRM where AI sorts and people decide.
- **Engineering Smart System:** tender emails become approved quotations. AI agents run each task on the cheapest model allowed for its data; nothing leaves the company until a person approves it.
- **Automated daily work** across sales, hiring, quotations, tenders and product data, in Arabic and English.

Social Media Manager & Digital Marketing Specialist 2021 – 2025
Al-Ma'ali Satellite Channel · Remote

MY PRODUCTS · MK SUITE (ARABIC/ENGLISH)

- **MK Business OS** – AI sales workspace: hot buyers first, each with a source; it drafts, the owner sends.
- **MK Job Orbit 2.0** – AI job search: finds jobs, checks them against your facts, and waits for your OK.
- **Talent Atlas** – hiring desk: hire across borders with proof; claims are checked and a person decides.
- **MK Voice** – local AI voice studio: clone, convert live and train voices on your own PC.
- **Montage Pro** – multicamera video studio: every angle, every word, your cut.

AI ENGINEERING

- **Agent-led delivery:** I direct Claude Code and Codex agents with a private shared memory (agent-brain), so every agent starts from the real project context.
- **AI lab** (private, demo on request): ask-repos answers questions about code with source links (RAG, LangGraph); RelayOps is a workflow control plane; plus governed AI automation templates.
- **Software in Motion** – my portfolio: a cinema for software, where every product gets its own film world.

SKILLS

AI & agents	LLM agents, multi-model routing, RAG, MCP, evals, local AI (Ollama), human-in-the-loop
Automation	Workflow engines, browser automation, APIs and webhooks, email and WhatsApp intake
Build & ship	Python, TypeScript, PostgreSQL, React, Electron, GitHub Actions, Windows/macOS apps

EDUCATION & LANGUAGES

Education	**BSc, Artificial Intelligence** · Egyptian Russian University, Egypt · 2020–2024
Certification	Verified AI Engineer Certification · Sahl
Languages	Arabic (native) · English (fluent)
